## EVEREDGE® TECHNOLOGY

Hu-Friedy's EverEdge Technology is unlike anything you've experienced before in a scaler. We've combined state-of-the-art technology in metallurgy, heat treatment and cryogenics to create a superior stainless steel that keeps your scalers and curettes sharper longer. That means less frequent sharpening, less hand fatigue, and greater comfort throughout the day.

“ As an educator, I always recommend Hu-Friedy's EverEdge instruments to my dental hygiene students. When well maintained, they can be sharpened so quickly and easily. A real advantage of the fine sharp cutting edge is **less hand fatigue for the hygienist and better comfort for the patient**, so both the clinician and patient can feel the benefits of EverEdge. ”

– Jill Nield Gehrig, RDH, MA  
Dean Emeritus, Division of Allied Health

### STAYS SHARPER LONGER

The revolutionary stainless steel alloy is super-durable and stays sharper longer so the clinician can spend less time sharpening.

### PROPRIETARY PROCESS

Our proprietary processing ensures that the superior edge retention and wear characteristics of EverEdge Technology will last the entire life of the instrument. Since it's not a superficial coating, they can be resharpened like any other scaler to extend the useful life.

### FINELY-HONED FINISH

EverEdge Scalers feature a hand-crafted finish from Hu-Friedy's professional artisans that keeps edges effectively sharp and allows for efficient scaling.

### DIAMOND KNUURL

The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

### COMFORT ZONE CONE WITH SIGNATURE SERIES GRIP

The cushioned grip provides a smooth transition and increased comfort. With distinctive Ocean Blue grips, EverEdge scalers can be easily identified in a set up or customized for your office's needs.

### NOW AVAILABLE IN RESIN 8 COLORS

These lightweight resin handles use a color-coded system to easily identify scalers and curettes that correspond to anatomical areas of the mouth.

## SCALER CHECK-UP

Hu-Friedy uses the highest quality materials and processes to create EverEdge scalers' long lasting cutting edges but they still need to be regularly maintained and then replaced after a certain amount of time. The useful life of a scaler depends on several factors including: frequency of use, frequency of sharpening, sterilization method and clinical applications. Hu-Friedy recommends that you regularly audit your scalers to determine when they should be replaced.

### AUDIT CHECKLIST:

- Retipped instruments
- Dull/chipped cutting edge or point
- Broken or bent tips
- Thin/worn-out blades
- Pointed curettes
- Corrosion

### DID YOU KNOW?

Curettes are designed with a rounded toe for patient comfort during subgingival scaling. Sharpening can turn this "toe" into a point and cause patient discomfort when used subgingivally.
