

HU-FRIEDY PEDO CROWNS

Stainless Steel Primary Molar Crowns

Experience the perfect fit

“When you use over 3000 SSCs a year you really appreciate the fit of the Hu-Friedy stainless steel crowns. I love the way they naturally contour to the tooth and their height is perfect! The Hu-Friedy SSCs have excellent wear, even with all of the random things kids bite and chew on. **They have made my pediatric dental practice easier and I am happy to recommend such a great product!**”

Mandy Ashley DMD, M.S.Ed., MS | Bowling Green, KY

POINTS OF PERFORMANCE

These stainless steel primary molar crowns were developed to deliver consistent, accurate and predictable clinical outcomes, while allowing the practitioner to work more effectively and efficiently, ensuring more time for value-added services such as patient education and treatment planning.

- More narrow mesial-distal maxillary first molar width for quicker adjacent crown placement
- Ideal wall height meaning less trimming and crimping (if at all!)
- Pre-trimmed, crimped and contoured surfaces for less time spent chairside
- Accurate occlusal anatomy mimicking the natural tooth
- Optimal occlusal thickness with superior resilience to abrasion and perforation

PEDO CROWNS KIT PART CODE

Introductory Kit

SSC-KIT

“We exclusively use Hu-Friedy Pedo Crowns for upper first molars because **we find the anatomy to be much more accurate than competitors**, resulting in less time required and a better clinical result.”

S. Michael Bozard, DMD | Spartanburg, SC
