

SWIVEL XT™ ULTRASONIC INSERT

EXTRA THIN. EXTRA TOUGH.

FACT

98% of clinicians use ultrasonic scaling as part of their regular treatment plan.* It is crucial that clinicians have access to instrumentation that facilitates their ability to deliver optimal patient care.

CHALLENGE

Traditionally, thin inserts are recommended for light deposit removal. However, subgingival deposits are often times tenacious and very difficult to remove.

SOLUTION

Swivel XT is thin enough to provide access to hard-to-reach areas, yet strong enough to remove tenacious deposits effectively.

POINTS OF PERFORMANCE

- Unique tip diameter and geometry for ease of accessibility and adaptability
- Enhanced metal fatigue characteristics for improved product durability
- Patented Swivel™ technology for improved clinician comfort
- Soft, large diameter grip for optimal ergonomics and tactile sensitivity

- 88% of clinicians who tried Swivel XT said they were likely to purchase it.*
- 78% of clinicians who used Swivel XT in a split mouth trial preferred it over the leading ultra thin insert.*

How the best perform

SWIVEL XT™ HAS IT ALL

EFFICACY

- 91% of clinicians who have tried Swivel XT rated it good/excellent for the removal of moderate deposits.*
- 73% rated it good/excellent for the removal of tenacious deposits.*

"Very efficient, very effective at removing moderate stain and calculus."
- Donna Grzegorek, RDH

"In the case of moderate-to-heavy calculus removal, it proved to be even more effective than a standard insert because it was able to go deeper between the teeth and the precision of removal was outstanding."
- Tara Robinson, RDH

ACCESSIBILITY AND ADAPTABILITY

- 97% of clinicians who tried Swivel XT rated it good/excellent in terms of accessibility.*

"I liked the angle of the insert and the fact that the working end was thin enough to get to hard-to-reach areas." - Ayako Miyagi, RDH

COMFORT

- 94% of clinicians who tried Swivel XT rated it as comfortable for their patients.*

"The adaptation of the instrument was great, as was the patient comfort." - Kindra O'Rielley, RDH

"I never realized how uncomfortable my hand would get while using any other ultrasonic insert. After using a non-Swivel insert on one side of the mouth and then using a Hu-Friedy Swivel insert on the other half of the mouth, I felt that my hand just glided along the teeth with less fatigue and stress on my wrist, arm and shoulder. I never realized this until I tried them side by side. I now really appreciate the Swivel feature of the Hu-Friedy ultrasonic inserts." - Linda Aoki, RDH
