Introducing AIR-FLOW THERAPY

AIR-FLOW Therapy is completely different than other air polishing systems. This advanced technology offers benefits to both the clinician and patient that are difficult to replicate with other procedures.

AIR-FLOW Therapy, along with glycine or erythritol powder, is safe and effective for tissue, enamel, root surfaces, porcelain composite restorations, orthodontic appliances, implants and implant abutments.

BRING AIR-FLOW TO YOUR PRACTICE WITH A HANDY DEVICE!

A great introduction to AIR-FLOW Therapy, the handy 3.0 is a lightweight handheld device that connects to your dental unit. Designed with a team of ergonomics experts, the slim handpiece is easy for the clinician to grip and rotate, while the position of the powder chamber ensures an unrestricted view of the treatment area.

WHAT IT DOES:
- Polishes teeth
- Removes stain
- Purifies subgingival biofilm

PATIENT BENEFITS:
- Increased comfort
- Healthy gingiva
- Grill-free polishing
- Faster procedure

CLINICIAN BENEFITS:
- Effective biofilm disruption
- Efficient treatments
- Happier patients

DEVICE OPTIONS

STANDARD HANDPIECE
- Designed for Classic Powder
- Ideal for supragingival stain removal applications
- Included with standard AIR-FLOW handy 3.0 device

PLUS HANDPIECE
- Designed for fine-grain FERO or PLUS Powder
- Ideal for supragingival biofilm removal, including on extra soft and restorative materials, as well as subgingival biofilm removal up to 3 mm
- Safe for peri- and interproximal maintenance patients
- Included with AIR-FLOW handy 3.0 PREMIUM device and compatible with AIR-FLOW handy 3.0 FERO device (sold separately)

PERIO HANDPIECE
- Designed for fine-grain PERIO or PLUS Powder
- Flexible plastic nozzle is inserted directly into pockets to flush out biofilm
- Safe for peri- and implant maintenance patients
- Included with AIR-FLOW handy 3.0 PREMIUM and AIR-FLOW handy 3.0 PERIO devices

AIR-FLOW HANDY 3.0 PREMIUM
- For complete biofilm removal
- Includes both PLUS and PERIO handpieces for supragingival and subgingival applications
- Easily switch between handpieces during treatment
- Designed for optimal delivery of FERO or Plus Powder

AIR-FLOW HANDY 3.0
- For supragingival stain removal
- Includes both PLUS and PERIO handpieces for supragingival applications
- Designed for Classic Powder, but can be used with FERO or PLUS Powder

CLINICAL CAPABILITIES

AIR-FLOW CLASSIC POWDER
- The Classic Powder offers the well-known cleaning efficiency of sodium bicarbonate with improved patient comfort due to a smaller average particle size than standard sodium bicarbonate powders.
- While the Classic Powder is primarily used for supragingival removal of stains and colorations, it can also be used in conjunction with other soft tissue treatments before dental treatments.
- Sodium Bicarbonate
  - 40 µm
  - 120g per bottle

AIR-FLOW PLUS POWDER
- DV-117/A
- AIR-FLOW PLUS Powder is the first powder that is safe to use for supra- and subgingival biofilm removal but strong enough to efficiently remove light to moderate stain. The finest grain powder in dentistry, PLUS Powder’s erythritol-based, minimally abrasive spray can be used on virtually every patient.
- Erythritol
  - 14 µm
  - 120g per bottle

AIR-FLOW PERIO POWDER
- DV-110/A/HS
- AIR-FLOW PERIO Powder’s fine, low-density grains safely and completely remove harmful biofilm and bacteria both supragingivally and subgingivally.
- Made from glycine, an amino acid, PERIO Powder is gentle on enamel and restorative surfaces, minimizing the patient experience more comfortable.
- Glycine
  - 25 µm
  - 120g per bottle

AIR-FLOW HANDY 3.0 PERIO
- For direct subgingival biofilm removal
- Includes PERIO handpiece for subgingival applications up to 5mm deep*
- Designed for FERO or PLUS Powder

*AIR-FLOW handy 3.0 PREMIUM handpiece can be used in conjunction with Classic Powder.
