

HU-FRIEDY DIAGNOSTIC INSTRUMENTS

| It All Starts Here

PROBES: Qulix™ probes are color-coded with accurate, smoothly finished black markings, which will not chip, flake or fade.

EXPLORERS: Hu-Friedy explorers are hand crafted from Duraspond™ steel, a specially blended steel alloy which provides flexibility and resilience for even the most precise diagnostic procedures.

EXPROS: A double-ended instrument with an explorer on one end and a probe on the other, Expros are excellent for dental examinations and charting.

MIRRORS: All Cone Socket Mouth Mirrors feature rhodium coating to resist scratching, front surface for sharp and distortion free images and smooth finish for patient comfort.

DRESSING PLIERS: Used to grasp or transfer materials in and out of the oral cavity, all Hu-Friedy dressing pliers are made of heavy-gauge, heat-treated stainless steel to prevent tip bending and misalignment.
