**Carpal Tunnel Syndrome Prevention:** Neurologists recommend alternating instrument handle sizes as one means of reducing stress. Larger diameter handles (#6, #7, #8 and #9) help lighten instrument grasp. Using a combination of various handle sizes plus a more relaxed grasp can help lessen the severity of the symptoms of Carpal Tunnel Syndrome.

NEW FINELY-HONED FINISH
EverEdge scalers are sharp...EverEdge 2.0 scalers are even sharper. Using an enhanced finishing process, Hu-Friedy’s professional artisans are creating edges that are scientifically measured to be over 60% sharper than the next closest competitor. Less force means easier, more comfortable scaling for the clinician and patient.

PROPRIETARY PROCESS
Our proprietary processing ensures that the superior edge retention and wear characteristics of EverEdge Technology will last the entire life of the instrument. Since EverEdge is not a superficial coating, the instruments can be resharpened like any other scaler.

DIAMOND KNURL
The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

STAYS SHARPER EVEN LONGER
EverEdge 2.0 uses a new, optimized heat control process in order to maintain the hard, sharp edge. This heat control, plus several manufacturing intricacies in Hu-Friedy’s proprietary process, provide the durability needed for effective procedures and continued use.

COMFORT ZONE CONE WITH SIGNATURE SERIES PURPLE GRIPS
Celebrating Dental Hygiene every day with new hygiene-purple grips! The colored grips also allow for easy identification of the EverEdge 2.0 scalers in each set-up.

“As an educator, I always recommend Hu-Friedy’s EverEdge instruments to my dental hygiene students. When well maintained, they can be sharpened so quickly and easily. A real advantage of the fine sharp cutting edge is less hand fatigue for the hygienist and better comfort for the patient, so both the clinician and patient can feel the benefits of EverEdge.”

— JILL NIELD GEHRIG, RDH, MA
Dean Emeritus, Division of Allied Health

“The EverEdge 2.0 blades sharpened very easily and remained sharp with each additional use.”

— JUDITH REID, M.Ed, RDH

Visit Hu-Friedy.com/EE2 for more information.
If the instrument tip/handle combination you desire is not shown, we will be glad to provide you with a quote for its preparation. Instrument tips and handles are not sold separately.

SICKLE SCALERS
Designed for the removal of supragingival calculus

H6/H7
Hygienist
| SH6/79E2
Handle options: #2, #4, #6, #7, #8, #C8, #9
Thin, contra-angle design is for interproximal areas. Shank angulation provides accessibility to all anterior and premolar surfaces.

H5/33
Hygienist-Jacquette
| SH5/339E2
Handle options: #2, #4, #6, #7, #8, #C8, #9
Thin sickle scaler combined with a straight sickle blade. For scaling interproximal and cervical areas of anterior teeth.

H5/U15
Hygienist-Towner
| SH5/U156
Handle options: #2, #4, #6

6/7
Goldman
| SHG6/76
Handle options: #2, #4, #6, #7, #8
Shortened blade version of H6/H7.

U15
Towner
| SU156
Handle options: #2, #4, #6, #7, #8

U15/30
Towner-Jacquette
| SU15/309E2
Handle options: #2, #4, #6, #7, #8, #C8, #9

U15/33
Towner-Jacquette
| SU15/339E2
Handle options: #2, #4, #6, #7, #8, #C8, #9

Some scalers and curettes are available in an American Dental Classic style that is slightly more rigid in design, with a 5/32" working end. They are offered exclusively in ResinEight® handles. Contact your Hu-Friedy representative for specific part code availability.
NEVI® SCALERS

**Nevi 1**
Anterior
| SCNEVI19E2
Handle options: #6, #7, #8, #C8, #9
An elongated disk end for anterior lingual stain and calculus removal paired with a super thin, anterior curved sickle.

**Nevi 1/H5**
Anterior
| SCNEVI/H59E2
Handle options: #6, #7, #8, #C8, #9
An elongated disk end for anterior lingual stain and calculus removal paired with a larger H5 sickle – a thin curved blade for interproximal and cervical anterior areas.

**Nevi 2**
Posterior
| SCNEVI29E2
Handle options: #6, #7, #8, #C8, #9
A thin posterior curved sickle scaler, the unique contra-angle design is great for interproximal reach and ergonomic hand positioning.

**Nevi 3**
Posterior
| SCNEVI39E2
Handle options: #C8, #9
Thin, dual cutting blades provide effective placement in tight, narrow contacts and interproximal areas and precise access for effective removal of light to moderate deposits.

**Nevi 4**
Posterior
| SCNEVI49E2
Handle options: #C8, #9
Tapered dual cutting blades provide precise access for effective deposit removal and increased shank rigidity provides for effective removal of burnished, heavy and tenacious deposits.
### JACQUETTE SCALERS

#### THE STRAIGHT SICKLE SCALER
Two cutting edges on a straight blade that end in a sharp point (also known as a Jacquette Scaler).

#### THE CURVED SICKLE SCALER
Two cutting edges on a curved blade that end in a sharp point.

SCALER/CURETTE SETS

GOLDMAN-FOX SET

GF-1 Universal Scaler | SGF16
Handle options: #4, #6

For removing heavy supragingival and subgingival calculus; Useful on proximal surfaces and interproximal areas during periodontal surgical procedures.

GF-2 Curette | SGF26
Handle options: #4, #6

Contour design for removal of calculus on anterior teeth and premolars

GF-3 Curette | SGF36
Handle options: #4, #6

Same blade surface as GF-2, but specifically designed for the proximal surface of the posterior teeth.

GF-4 Curette | SGF46
Handle options: #4, #6

Additional bend in the shank for easier calculus removal in the molar region

GF-5 Hoe Buccal/Lingual | SGF5
Handle: #4

For removing heavy calculus deposits

GF-6 Hoe | SGF6
Handle: #4

For mesial/distal surfaces of the posterior teeth or facial/lingual surfaces of the anterior teeth

GF-21 Curette | SGF21
Handle Options: #4, #6

Sharp spoon on one end is for debridement in curettage procedures. Small scaler on the other end can be used with either a circumferential or vertical stroke.

GF-21S/33 Combination | SGF21S/33
Handle Options: #2, #4

Small end Goldman-Fox scaler with a #33 straight miniature Jacquette scaler

CATTONI SET

103/106 | S103/1066
Handle options: #4, #6

104/105 Hoe/Chisel | S104/1056
Handle options: #4, #6

107/108 | S107/1086
Handle options: #2, #4, #6, #7, #8

107/108S Modified | S107/108S
Handle options: #2, #4

Shorter shank than the S107/108
LANGER CURETTES

Langer 1/2 for mandibular posterior

1/2 Langer (shown)
| SL1/29E2

17/18 Langer (shown)
| SL17/189E2
Handle options: #4, #6, #7, #8, #C8, #9

17/18 Rigid
| SL17/18R6
Handle options: #4, #6

Langer 3/4 for maxillary posterior

1/2 Langer Mini Five
| SL1/2MF6
Handle options: #4, #6, #9

3/4 Langer Rigid
| SL3/4R6
Handle options: #4, #6, #7, #8

5/6 Langer Rigid
| SL5/6R6
Handle options: #4, #6

Langer 17/18 for maxillary and mandibular posterior

5/6 Langer After Five
| SL5/6AF6
Handle options: #4, #6, #9

5/6 Langer Mini Five
| SL5/6MFPE2
Handle options: #4, #6, #9

5/6 Langer After Five
| SL5/6AF6
Handle options: #4, #6, #9

Langer After Five and Mini Five Curette terminal shanks are elongated by 3 mm for access into deep periodontal pockets and root surfaces of 5 mm or more.

Blade is 10% thinner than standard Langer to ease gingival insertion and reduce tissue distention.

Langer Mini Five Curette has a reduced blade, half the length of the After Five Langer Curette or standard Langer, for better adaptation in narrow pockets and furcations.

LANGER APPLICATION CHART

Langer curettes have the shank design of a Gracey curette combined with a universal blade. These instruments can scale all surfaces.

Blade angulation of a Universal Curette

Blade angulation of a Gracey Curette
**STANDARD GRACEY CURETTES**

- Area-specific allows for deep scaling, root planing and periodontal debridement.
- Offset blade provides a perfect working angulation for the tooth surface.
- Offset blade angulation means only the lower cutting edge of each blade is used.

Extra Rigid Gracey curettes are ideal for tenacious calculus removal, gross scaling, and initial debridement. Blades, however, are identical in size to standard Gracey curettes.
Long contra-angle for molar buccal and lingual surfaces and a more pronounced angle than 7/8 for less accessible root surfaces.

Angulated to reach mesial surfaces of posterior teeth

Angulated to reach distal surfaces of posterior teeth

Same shank bends as 13/14, but blade positioned to reach mesial posterior surfaces

Accentuated angles improve access to distal posterior surfaces. The 17/18 also has smaller blade and slightly longer terminal shank.

The Rigid Gracey has a thicker, stronger, and less flexible shank than the standard Gracey. This allows for removal of moderate to heavy calculus.

Area-specific curettes also available in Kramer-Nevins and Turgeon designs.
PERIODONTAL MAINTENANCE CURETTES BY ANNA PATTISON

- Shorter, thinner, smaller blades
- Honed at a 60° angle
- Modified rigid shank specially designed to allow easier access and easier insertion under tight tissue

**HU-FRIEDY THINNING SERVICE**

Most scalers and curettes (except After Five* and Mini Five*) can be thinned to create an extra fine blade. Add TSDE to double-end or TSSE to single-end to the original part code.
**AFTER FIVE® GRACEY CURETTES**

- Designed to adapt to a specific area or tooth surface.
- Terminal shank is 3 mm longer than Standard Gracey.
- Longer terminal shank allows better access to deep pockets and areas with recession.
- Blade is 10% thinner than standard Gracey curette to allow for less tissue distention when accessing deeper pockets.

**MINI FIVE® GRACEY CURETTES**

- Terminal shank is 3 mm longer than Standard Gracey.
- Compared to the standard Gracey curette, blade is 50% shorter and 10% thinner.
- Good for scaling in deep, narrow pockets.

THE CLAYTON GRACEY STORY
In the late 1940s, an innovative dentist from the University of Michigan had a vision. Clayton Gracey wanted to “give every dentist the possibility to treat even the deepest and least accessible periodontal pockets simply and without traumatic stretching of the gingiva.”

Dr. Gracey brought his idea to Hugo Friedman, the founder of Hu-Friedy, who supported his concept. Together they developed a series of 14 single-ended area-specific instruments for the successful removal of deposits from root surfaces.

Dr. Gracey’s designs laid the groundwork for the new instruments of today. Currently, Gracey curettes are available as double-ended instruments with multiple handle choices.

The Gracey curettes have come a long way since the original design. Hu-Friedy currently manufactures a variety of styles and patterns, such as After Five® curettes with a longer terminal shank and thinned blade, Mini Five® curettes with After Five® features and a shorter blade, and the 15/16 and 17/18 patterns. An optional Rigid shank is available on all of the Gracey designs.

Hu-Friedy is continually looking for new ways to improve our existing products. Our success is dedicated to the pioneers in dentistry, including Dr. Clayton Gracey, who helped to make a vision become not only a reality, but also a part of every dental office today.
RESIN 8 COLORS
For EverEdge & EverEdge 2.0

Hu-Friedy’s Resin 8 Colors are ergonomic, lightweight and offer a color-coding system based on specific areas of the mouth. Plus, each scaler and curette features Hu-Friedy’s proprietary EverEdge® technology, which keeps the working ends sharper longer. See the full list of Resin 8 Colors part codes on page D27.

*Designed in consultation with Trisha O’Hehir, RDH.

The DeMarco Curettes are excellent for stain removal on anterior lingual surfaces.
Scaling with Implacare II caused the least alteration to the abutment surface.

TITANIUM IMPLANT SCALERS

Perform at your best with Hu-Friedy’s new, state of the art line of Titanium Implant Scalers. Made from the same titanium alloy as implants and abutments, these scalers are expertly designed and manufactured for implant maintenance, debridement, biofilm removal and can be used both supra and subgingival.

- Significantly increased visibility with Hu-Friedy’s signature teal colored anodized titanium
- Optimized sharpness with finely honed cutting edges and sharpened post anodization process
- Ability to be sharpened at any time to increase the useful life of the instrument
- Enhanced ergonomic handle for maximum tactile sensitivity and support

DIAMONDTEC® FILE SCALERS

- The perfect size and shape to enhance definitive scaling in furcations and root depressions
- Double-ended designs allow for more efficient scaling
- Large diameter handle provides an ergonomic grip and helps reduce the symptoms of CTS*
- Signature Series grips make instruments easy to identify
- Diamond coated file scaler

KRAMER-NEVINS CURETTES

- The Kramer-Nevins modified Gracey curette series is designed for root planing and subgingival curettage.
- Features slightly modified blade curvatures, thinner profiles, and extra length to help gain access to difficult areas without losing curette “bite.”
- Most commonly employed during initial pre-surgical preparation and with all maintenance patients.
- Also extremely useful during surgery.

DISPOSABLE PROPHY ANGLES

Hu-Friedy Disposable Prophy Angles feature ergonomic and design enhancements to improve clinical outcomes, reduce clinician stress and maximize patient acceptance. Available in standard straight and a 15° contra design with a choice of soft or firm cups, Hu-Friedy Disposable Prophy Angles enable you to perform at your best with the quality, reliability and performance you’ve come to expect from Hu-Friedy.

POINTS OF PERFORMANCE

- Inner spiral cup design with smooth exterior for superior paste delivery, greater interproximal reach and less splatter
- Precision-manufactured internal-drive components deliver reliable, smooth performance
- Proprietary grip for a light, secure grasp, greater rotational control and reduced hand fatigue
- Soft and firm cups meet clinician- and patient-specific requirements
- 15° contra angle style allows for a more comfortable, neutral wrist position
- Compatible with most common low-speed handpieces
- Not made with natural rubber latex

SIDEKICK SHARPENER

The Hu-Friedy Sidekick sharpener is designed for routine maintenance sharpening of scalers and curettes. Correct routine sharpening helps extend instrument life.

- The Sidekick sharpener is cordless for use anywhere in the dental office.
- Instrument Guide Channels and Vertical Backstops are “template-like” guides that help control blade angulation, providing consistent results.
- The Sidekick sharpener is compact and requires minimal space.

- Kit Includes: Sidekick Unit, User Manual and CD-ROM, Ceramic Sharpening Stone, Plastic Test Stick, Magnifying Lens and 2 AA Batteries.

### DIAMOND SHARPENING CARDS

- A uniform coating of industrial diamonds bonded to high quality stainless steel provides an extremely hard, flat surface for instrument sharpening.
- Durable surface resists grooving and ditching; remains flat after repeated use and will not break or shatter if dropped.
- Easy clean-up via ultrasonic cleaner and steam sterilization.
- Thin credit-card size shape allows sharpening cards to readily fit into sterilization pouches or cassettes with procedural set-ups.

### SHARPENING STONES

Stones at 50% of size

- **299 Arkansas Conical Super-Fine Grit**
  - **SS299**
  - 3-1/2" x 5/16" (8.9 x .8 cm) base.
  - Hard, for sharpening facial surface of curette.

- **No. 2 Arkansas Cylindrical Super-Fine Grit**
  - **SS2**
  - 4" x 1/4" (10 x .6 cm)
  - For sharpening facial surface of curette.

- **Ceramic Cylindrical Fine Grit**
  - **SSKC**
  - 4" x 5/16" (10 x .31 cm)

- **309 I-Stone Fine Grit**
  - **SS309**
  - 4" x 1/2" to 1/4" x 1/4" to 1/8" (10 x 1.3 x .6 x .6 x .3 cm)

- **File Sharpener Tanged Carbon Steel**
  - **FST**
  - 4-1/4" (10.8 cm) long

- **Hu-Friedy File Sharpener Carbon Steel**
  - **FS**
  - 5-1/2" (14 cm) long

- **Plastic Test Stick**
  - **PTS**
  - 3" x 1/4" (7.6 x .6 cm)
  - Available in packages of 6

- **Luxating Elevator Sharpening Stone Fine Grit**
  - **SSLUX**
  - For use with luxator elevators

- **Dual Grit Stone**
  - **SSDGRIT**
  - 4" x 5/8" x 1"
  - Features a coarse ceramic side for recontouring and a light ceramic side for finishing and honing.

W: Lubricate stone with water | O: Lubricate stone with oil | D: No lubrication needed
LARGE-SCALE INSTRUMENT MODELS

Used to help familiarize students with critical instrument surfaces, designs, and develop a better understanding of their application and maintenance. Models are 12" (30.5 cm) high.

| SS301
1/4” x 3/8” (6 x 10 mm) diameter

#303™
| SS303
1/4” x 1/2” (6 x 13 mm) diameter

#304™
| SS304
1/4” x 5/8” (6 x 16 mm) diameter

#305™
| SS305
6 x 19 mm

#300™
| SS300
3/8” x 1/4” (6 x 6 mm) at base

#302™
| SS302
1/8” x 1/8” (3 x 3 mm) diameter
MISCELLANEOUS

SIGNATURE SERIES GRIPS
Signature Series grips can only be used with Satin Steel Colours®, EverEdge® technology and ResinEight® instruments and are used for identifying and organizing instruments. They’re useful for maintaining proper instrument order in cassettes and identifying instruments by procedure. Grips will withstand all approved heat sterilization methods.

All single color packages contain 16 pieces. The assorted color packages contain your choice of either 16 or 80 pieces.

Brush Handle 1
| HCB1
Used for pit and fissure sealant, acid etch, and placement procedures. Made of Immunity Steel® material to allow sterilization by autoclave. Design holds most manufacturers’ brush inserts.

Immunity Steel Pumice Cup, Modified
| PCUPM
Used to hold prophy paste or medicaments. Made of corrosion resistant, acid-proof stainless steel.
